 kianapahlevan.ir

Computer Science student and Data Engineer with 2+ years of experience in designing and implementing scalable data-driven solutions. Skilled in Python, SQL, data processing, and pipeline development, with experience in RAG-based and agentic AI systems.

EDUCATION

B.Sc. Computer Science, Amirkabir University of Technology 2023 – Present
Tehran, Iran | GPA: 18.4/20

High School Diploma in Mathematics and Physics, NODET 2020 – 2023
Tehran, Iran | GPA: 19.51/20

WORK EXPERIENCE

Data Engineer — Thousandways Co. Ltd. 2024 – July 2026

- Built Pandas and PySpark pipelines to clean, transform, and prepare 4+ GB of data for analysis and reporting.
- Developed ZhaavSAS, an offline RAG-based smart assistant system integrating local LLMs.
- Engineered LLM-based agentic workflows using tool calling, memory, and multi-agent orchestration.

Head TA — Amirkabir University of Technology Spring 2026
Advanced Programming and Workshop, Dr. Ahmadian

- Coordinated 25 TAs and wrote/edited 15 educational materials on OOP and databases.
- Designed over 50 programming exercises and supported 72 students in Java and advanced programming concepts.

Undergraduate TA — Amirkabir University of Technology

- Advanced Programming and Workshop, Dr. Ahmadian Fall 2025
- Advanced Programming and Workshop, Dr. Mehdi Ghatee Spring 2025

- Data Structures and Algorithms, Dr. Mahsa Saadat Fall 2025

PROJECTS

Management Dashboard for Therapy Clinic (Power BI)

- Designed and built a Power BI management dashboard for a therapy clinic with a staff of approximately 200 employees, covering triage, admissions, marketing, treatment, and patient data.
- Enabled clinic ownership to monitor departmental performance in real time, identify operational bottlenecks, and improve efficiency using previously siloed data.

Multi-Agent AI Workflow

- Architected agent workflows for multiple task types and use cases.
- Implemented multi-agent patterns (supervisor, sequential handoff, and peer review) with role-based agent specialization.

Agentic Task Automation with Hermes Agent (Nous Research)

- Integrated Mem0 as a persistent memory layer, reducing context token usage by 72% while maintaining relevant information across sessions.
- Automated scheduled agent workflows using cron jobs for recurring task execution.

TECHNICAL SKILLS

Data Engineering
Pandas • NumPy • PySpark • ETL/ELT • Data Modeling
Database
SQL • PostgreSQL • MySQL
LLMs & AI Systems
OpenAI APIs • Ollama • RAG • Agentic AI

Programming Languages
Python • Java • C
Visualization & BI
Tableau • Power BI
Backend & Infrastructure
FastAPI • Docker • Linux • Git • LaTeX

CERTIFICATES

Data Analysis

Tehran Institute of Technology, 2025

Git Practical Training

Quera College, 2025

SOFT SKILLS

Collaboration & Communication

Team Coordination • Mentoring • Technical Communication

VOLUNTEER EXPERIENCE

Executive Team Member, DAI-DAY

2025

LANGUAGES

English

Full Professional Proficiency

Machine Learning

Tehran Institute of Technology, 2025

Data Structures and Algorithmic Thinking

Quera College, 2024

Problem Solving & Execution

Analytical Thinking • Prioritization • Adaptability

Game Coordinator, Khayyam–Turing

2024
